

Greetings,

So if I just watched TV and believed everything voted officials told me over the past few months I would.....

1. Shoot 2 rounds through my door if I was potentially threatened at my house. (Felony)
2. Women should be raped on campus rather than carry a gun. There are safe zones and call boxes for safety. (Rapist don't go into safe zones where there are call boxes!)
3. A pistol grip makes a gun easier to hold at the hip and spray fire. (Someone has some flexible wrists to do this)
4. An AR15 shoots this supposed high powered baby killing round that has no place in society.(the round is on the low side of the spectrum in terms of size and power)
5. High Capacity ammunition and Gun trafficking should be illegal.(huh? I'm pretty sure they already are)
6. A stock, grip, and threaded barrel makes a gun more deadly (seriously, this just shows your ignorance)
7. 10 rounds in a magazine makes criminals not kill people and we are now safer. (Really?)
8. "common sense" gun laws are being constructed by people that do not know the difference between a clip and a magazine and semi automatic vs fully automatic.
9. Banning "assault rifles" and standard capacity magazines from law abiding citizens is going to make us safer because.....(still cannot figure this out)
10. Taxing ammunition will somehow make us safer by taking money out of the pockets of law abiding citizens that purchase ammunition more often than the criminals that either steal or buy it for their low round illegal acts.
11. A black gun that shoots a .223 is more danger than a wooden stock gun that shoots a .223. (Because we live in a looks society!)

12. Retired law enforcement can have these guns but retired military has ptsd and are too dangerous to allow to have "assault" weapons. (But they are perfectly ok have them while defending the country.)

One final thing, should these proposed laws actually become law making me a felon, I would like to tell you how that will affect my life, when I've committed no crime. I currently have a Top Secret Security Clearance, should the proposed legislation pass....I will lose my security clearance, and my job...thereby rendering me useless to society to become dependent on the Govt. for support....of course this is the master plan isn't it, you want people dependent on the Govt. because that ensures that you will have votes, because of your entitlements given out. I can assure you I don't want the Government's assistance...I just want you to leave me the hell alone! I'm not breaking any laws, and yet you are going to turn law abiding gun owners into felons...for what?? Nothing!

I just read that the Newtown killer, had researched other mass killings, and the state police briefed first responders recently saying that they think his motive was to try to out do those other killings....So one would assume that it wouldn't of mattered what the weapon was that was used in this tragic event..based on that information this person was intent on causing as much destruction he could, and by any means possible, it just so happens that it was a gun that was used...so all this needless proposed legislation is targeting the wrong thing...as I've said from the start, it wasn't the gun that did the killing it was the person pulling the trigger...let's place the blame where it should be, and not try to cash in on innocent law abiding gun owners because of some mentally deranged individual! This state makes me sick that it would take a tragic even and try to turn it into a revenue stream on the backs of innocent law abiding gun owners!
